

Now more than 550 Installations World-wide in a Wide Range of Industries

API PRO is designed with a unique flexibility in order to adapt easily into any industry, any size of organization and already existing routines.

Benefits claimed from the use of API PRO include greater productivity derived from increased process reliability and better all-round utilization of resources. Users are able to achieve a reduction in their long-term capital investment in equipment, spares and semi-finished goods. At the same time the staff can enjoy a less stressful environment.

Since 1986 API systems have been tested in some of the most demanding environments in the world, and are today implemented in all major industries in companies worldwide.

Enclosed you will find a list of industries and examples of the API PRO and API2 references in each industry. The major part of the references are API PRO installations.

- Automotive**
- Building Materials**
- Ceramics**
- Chemical Industry**
- Education**
- Electronics**
- Food Industry**
- Harbour**
- Medical Goods**
- Manufacturing**
